

## Broadband Speed Test on CNET Australia and ZDNet Australia

### The Test:

The broadband **Speed Test** allows readers to test the speed of their internet connection – and has been incredibly popular, with more than 3 million downloads across *CNET Australia* and *ZDNet Australia* audiences since launch in September 2007.

The test is measured by calculating the time that it takes readers to download a specific set of data they can use to measure their connection at home, school or work.

The Broadband Speed Test Forums have also been popular allowing readers to discuss their broadband experiences with other readers in an engaged, open community setting. To date, over 2,000 forum postings have been part of discussions sparked by the Broadband Speed Test.

**Broadband Speed Test**  
How fast is your Internet connection?
